

Money Management

1. Log into home banking.
2. Select the "Financial Tools" tab and click "Money Mangement."

3. Agree to the terms and conditions.

What Can You Do with Money Management?

Money Management links your account to help you track your transaction history and categorizes your payments.

Linking your account helps Money Management to categorize your spending and set up a spending chart. Once you are able to view your spending chart, you can create budgets. The product also alerts you when there is a change to your goals.
